# INTEGRA HP™ RE

Mannington Commercial recognizes that designers and specifiers don't just want options—they want *choices that work*.

Integra HP™ RE is the result of Mannington Commercial's experience developing and manufacturing both carpet and hard surface flooring. The innovation and proven performance of these two technologies are fully integrated into the Integra HP™ RE backing system. Also integrated is *responsibility*—Integra HP™ RE contains a minimum of 10% post-consumer recycled content.

The performance and durability of Integra HP™ RE allows you to keep the carpet on the floor longer—the most significant way to reduce the impact on the environment.

Combined with other features, like 9' and 12' widths for easier installation, an impermeable moisture barrier and the ability to be chemically-welded with Mannington resilient products, Integra HP™ RE Eco-savvy Performance Broadloom is a choice that works.

**eco-savvy  
performance  
broadloom**

- Contains a minimum of 10% post-consumer recycled content by total product weight
- Proven performance keeps carpet on the floor longer — the most significant way to lessen environmental impact
- CRI Green Label Plus
- Adhesives meet VOC content limit of SCAQMD Rule 1168
- ISO 14001 registered facility
- Fully recyclable via LOOP™
- Contributes to LEED Credits

## chemically weldable seams

- Impermeable moisture barrier
- Can be chemically welded to Mannington's resilient sheet flooring products eliminating most transition moldings
- Exceptional lateral seam strength
- Lower profiles for safer foot and rolling traffic
- Lab test of properly welded seams showed no growth of staph or pneumonia bacteria

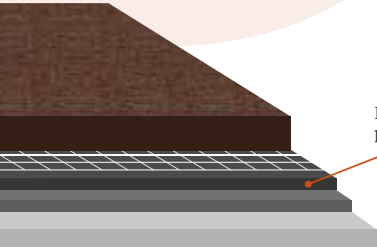

Chemically welding Integra HP™ RE to Mannington resilient products eliminates most transition moldings and insures moisture barrier continuity.

Choices That Work.

BROADLOOM

## moisture barrier

- Impermeable non-aqueous polymer precoat secondary layer stops moisture
- Eliminates wick-back staining — moisture won't go in or through it
- Withstands aggressive wet cleanings
- Chemically-weldable seams
- High tuft bind, wet/dry
- Passes British Spill/Moisture Impact Tests

## installability

- 9' and 12' widths
- Fewer seams, less trim waste required.  
Fifty percent less seams when compared to 6'
- Flexible construction allows for ease of installation  
in cold or hot environments
- Increased adhesive spread rate results in lower installation costs
- Traffic and furniture can resume immediately after installation

Choices That Work.

## warranty

- Limited Lifetime Warranty
- Moisture Barrier
- Wick-back Staining
- Delamination

- Tuft Bind
- Static Charge
- Zippering/Unraveling
- Wear
